nJoin Power Module

This sleek and modern-looking power module links up to any WarmlyYours thermostat in the nSpiration series to increase electrical output in 15 amp increments to allow for heating large applications or additional areas. Simply put, if you need to heat a larger area with one master thermostat, the nJoin power module/s can help.

Features/Benefits

- Item number: USG-4000
- Self-Test GFCI
- cULus Class A approved
- Dual voltage: 120 V and 240 V
- Max load: 15 Amps
- 3-year warranty

Note: The WarmlyYours nJoin power module must be used in conjunction with a qualifying master thermostat.

WarmlyYours Radiant Heating Thermostats

When you purchase an electric radiant heating system from WarmlyYours, you can choose from a selection of different thermostats so that you're sure to find one that will meet your specific needs.

Our controls offer a wide variety of options—from programmable models to WiFi-enabled controls that will allow you to easily monitor and manage your home comfort remotely from your smartphone. All of our controls are designed to help you get the most out of your radiant heating system (whether it's electric floor heating or a hardwired radiant heating panel).

Not sure which control is best for your project? Call (800) 875-5285 or email us at info@warmlyyours.com and we'll be happy to help you decide.
