

Job Name: _____

Room Type: _____

Scale: 1 Box = ____ ft

► **Contact Information:**

Name _____ ZIP/Postal Code _____

E-Mail _____ Phone _____

► **Step 1:** Draw a rough layout of the room on the form. Include outlines and locations of all permanent fixtures such as bathtubs, toilets, vanities, cabinets, floor vents, floor outlets and appliances.

Step 2: Outline the area you want to warm.

Step 3: Add accurate room measurements, and dimensions of permanent fixtures. The more precise the dimensions provided to WarmlyYours the more accurately the final design will be prepared.

Step 4: Mark preferred thermostat location. Ideally a location within easy reach of an existing power supply.

► **Subfloor Type:** Wood Existing Concrete Slab
 Newly Poured Indoor Concrete Slab (Slab Heating)

► **Flooring Type:** Tile/Stone Nailed Hardwood* Laminate Carpet
 Floating Wood Glued Hardwood Resilients, Vinyl and Vinyl Tile
 Other _____ (If known, please indicate brand and model)
